

UNVEILING HERITAGE CERAMICS' 2024 PRODUCT LAUNCH: 6 NEW EXCITING SERIES

BY HERITAGE CERAMICS

MAY 2023

STUDIO - BERLIN GRIGIO

Heritage Ceramics, a renowned name in the world of premium quality porcelain, is all set to introduce its latest products to the market.

These new additions to their existing collections combine latest designs, glazes and modern technology.

With a focus on innovation and sustainability, Heritage Ceramics has been working tirelessly to develop the new series, which is set to redefine the standards of the industry.

We have five new series under Studio Collection which are Ikon, Carnico, Gems, Nordic and Shine and one new series which is Bari under Space Collection.

In this blog, we'll take a closer look at the exciting new features and designs of Heritage Ceramics' latest launch, and explore what makes it a must-have for any discerning ceramic lover.

BARI SERIES

This series is inspired by the natural beauty of Quartzite stone and are available in both structured R10 and Lapatto surface textures in 12 faces that offer a unique aesthetic stunning finish to any space. Bari is a full-body porcelain tile that boasts a low water absorption rate of only 0.1%, making it highly resistant to water damage. It is available in five different colours : Silver, Ivory, Grey, Walnut, and Anthracite. Bari Series also comes in various sizes including 600×600mm, 300×600mm, and 300×300mm, making it versatile for a range of installation options.

The collection imitates Quartzite, which belongs to silent, Northern settings. Because of the stone's adaptability, architectural spaces can freely blur the lines between interior and external spaces. Bari is a blend of primordial elegance and contemporary vigor that sits alongside the most inventive design trends.

Overall, the Bari Series is a high-quality, durable, and aesthetically pleasing product that offers a range of benefits for both residential and commercial applications. Its natural inspiration and various size options make it an excellent choice for anyone looking to add a touch of beauty and functionality to their space.

IKON SERIES

The Ikon Series is a glazed porcelain tile that is inspired by the timeless elegance of Light Onyx marble. The tile comes in a classic white shade and is available in a large 600×1200mm size, featuring 9 faces, with a low water absorption rate of 0.1%.

The Ikon Series comes in two finishes : a polished and also a honed surface texture that gives it a stunning, high-end look. The design is like capturing the beauty secret of the most precious and sparkling pearls that brings new effects of brilliance and dynamism in ceramic material which is comparable to the material richness of the most expensive alabaster and onyx. It amplifies the effect of the tile's brightness and transparency, extending the illusion of space and flooding any setting with light. Overall, the Ikon Series is a stunning product that combines the beauty of Light Onyx marble with the practicality and durability of porcelain tile.

CARNICO SERIES

The Carnico Series is a glazed porcelain tile that is inspired by the classic Grigio Carnico marble. This tile comes in colours of Bianco, Perla, Grigio, and Nero, providing a range of options to choose from. It features both a polished and also a Griptec surface texture in a soft undulating surface in 9 faces, adding depth and texture to the tile's appearance.

The Carnico Series is a high-quality and durable product with a water absorption rate of only 0.1%. It comes in various sizes, including 600×600mm, 300×600mm, and 300×300mm, making it suitable for various applications such as floors, walls, and feature areas.

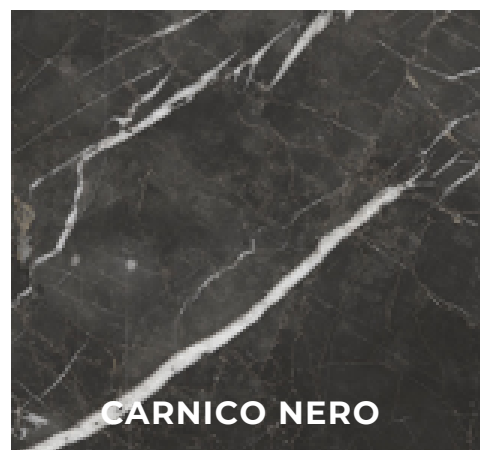

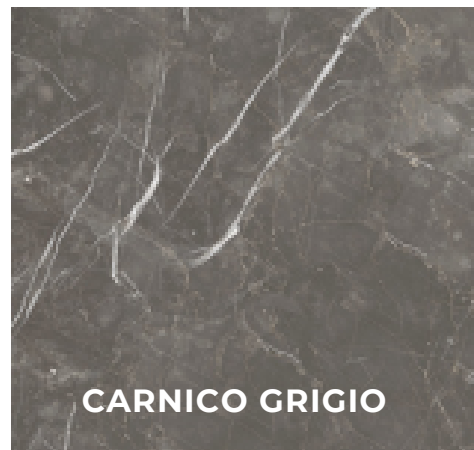

The design reference for the Carnico Series is derived from the timeless beauty of marbles. It inspires high-tech stoneware slabs that bring back all of the veining and shade variations of the finest, rarest stones, with better clarity and sustainability than the originals.

The design has its shining, brilliant colors, appear alongside renditions of the most traditional marbles, incredibly sophisticated versions, and the product of creative contemporary reworkings. The Carnico series is perfect for those who want to create a luxurious and refined atmosphere in their space.

The polished texture of the Carnico series adds a beautiful shine and depth to the tile, making it suitable for high-end residential and commercial applications. It is an excellent choice for those looking to add a touch of elegance and sophistication to their interiors.

CARNICO SERIES

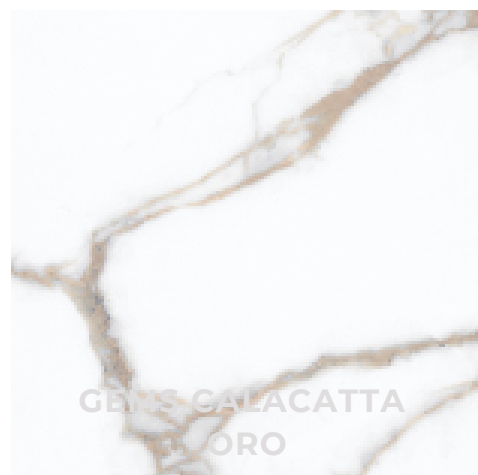

GEMS SERIES

The latest additions to our Gems Series is inspired by the luxurious Calacatta Gold marble.

In order to do justice to this grand marble, we are offering the new designs in two distinct colours – Calacatta Gold and Calacatta Oro – the former with fine veins and the latter with broader veins. This variety in design allows for customization and personalization in any space. The Gems Series has a low water absorption rate of only 0.1%, making it durable and resistant to moisture.

It comes in various sizes, including 600×600mm, 300×600mm, and 300×300mm, making it suitable for a range of applications such as floors, walls, and feature areas. This series feature a polished and a satin surface texture with 9 faces, adding depth and richness to its appearance.

The design reference is all about luxury and seduction. Gems interprets marble-a natural and ancient material – with a new awareness, in tune with the latest stylistic codes. The end product is a comprehensive style kit made for the interior design of any household or commercial location, with a strong emphasis on design. It is an excellent choice for those seeking to create an elegant and luxurious atmosphere in their homes or workplaces.

NORDIC SERIES

The Nordic Series is a glazed porcelain tile that is inspired by the rugged beauty of Norwegian stone. This tile features a Matt R10 and Lapatto surface texture with 9 faces, adding depth and texture to its appearance.

The Nordic Series is available in shades of Ivory, Perla, Ash, and Metal, providing a range of options to choose from. This series by Heritage Ceramics has a water absorption rate of 0.5%, making it suitable for use in areas with high moisture levels. It comes in various sizes, including 600×600mm, 300×600mm, and 300×300mm, making it ideal for use on floors, walls, and feature areas.

The design reference for the Nordic Series is derived from the historic Nordic stone extensively used in the Netherlands and Scandinavia, a combination of four authentic colors and with unique architectural canons suited to modern living trends. A project that makes the best use of porcelain stoneware's capabilities to produce elegant interiors and exteriors. The design reference adds to the tile's natural charm, making it an excellent choice for those seeking to create a warm and inviting atmosphere in their living spaces.

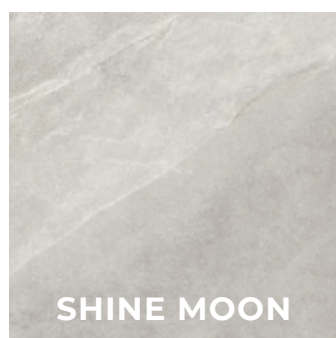

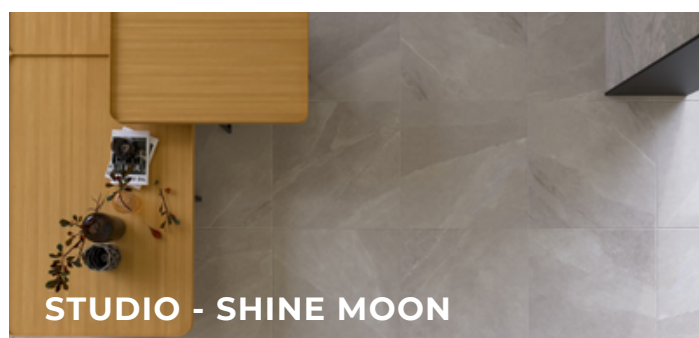

SHINE SERIES

The Shine Series is a glazed porcelain tile that draws inspiration from the smooth elegance of Soft Slate stone. This series feature a structured R10 and Lapatto surface texture with 12 faces, adding depth and character to its appearance.

The Shine Series is available in a broad range of colours : Bianco, Beige, Perla, Moon, Cenere, and Anthracite. These shades provide a variety of options to choose from, ensuring that the Shine Series is a versatile product that can be used in various design schemes. Additionally, the tile has a water absorption rate of 0.5%, making it suitable for use in areas with high moisture levels.

The Shine Series comes in various sizes, including 600×600mm, 300×600mm, and 300×300mm, making it suitable for use on floors, walls, and feature areas. Its design reference is from the natural essence of slate that creates a powerful new porcelain stoneware. This collection rejects artificial solutions in favor of exhibiting the results of extensive, creative research through coordinated indoor and outdoor surfaces. The new surface reveals graphic vitality, chromatic control, and studied metamorphic features, all of which are well-balanced but, most all, authentic. Every Shine module provides unique feelings. With its exquisite softness, the material shows the mineral features and delicate characteristics of split stone.
