

ENVIRONMENTAL POLICY

At Heritage Ceramics Pte Ltd, we acknowledge the significant environmental impacts associated with manufacturing facilities. As a responsible tile manufacturer, we are committed to sustainability and prioritise the development of sustainable tile innovations and technologies in our product offerings.

Sustainability Team

The Managing Director has been entrusted with the responsibility of seeking sustainability solutions and engaging sustainability professionals to support our efforts. Additionally, our production team plays a crucial role in research and development in sustainable products.

Our Commitment

At Heritage Ceramics Pte Ltd, we are committed to upholding the highest sustainability standards in the tile manufacturing industry, ensuring that our practices align with the expectations of our customers worldwide. We have proactively embraced various certifications and standards, including but not limited to:

- ISO 13006:2018: Promotes efficiency and reliability in tile manufacturing, indirectly contributing to sustainability by minimising waste and environmental impact. Compliance ensures product durability, extending lifespan and reducing replacements, aligning with sustainability goals.
- Singapore Green Label Certification: By obtaining the Singapore Green Label Certification, we affirm our commitment to environmental responsibility, demonstrating our efforts to produce tiles that meet stringent eco-friendly criteria.
- Singapore Green Building Product Certification: This certification underscores our proactive approach to sustainability, signifying that our products meet the rigorous standards set forth for green building materials in Singapore and beyond.

Green Procurement Practices

In our commitment to sustainability, we prioritise green procurement practices throughout our supply chain. We hold our partners to high environmental standards, ensuring that the materials and services we procure align with our sustainability goals. It includes assessing suppliers based on their environmental certifications, adherence to regulatory requirements, and commitment to sustainability initiatives.

Throughout our business partnerships, it will be emphasised that regular assessments of environmental standards are essential. Our quality control manager will conduct site visits to ensure compliance with these standards and promote environmental accountability.

Training and Education

To support our sustainability initiatives, we will provide adequate training to our partners, employees, and customers, fostering a shared commitment to sustainability. Our sustainability team will actively participate in workshops and training sessions focused on sustainable innovations, furthering our commitment to making a positive impact on the planet.

Collaboration and Cooperation

Active cooperation from all stakeholders is essential in our collective responsibility towards sustainability. Any breaches of environmental regulations identified will be addressed promptly and effectively.

Performance Metrics and Reporting

Heritage Ceramics' ultimate goal is to establish transparent metrics and report our environmental performance to customers and stakeholders.

This includes developing new sustainable technologies, educating end users, efficiently managing resources, ensuring product safety, and implementing environmental initiatives among our employees.

**This environmental policy will be subject to annual updates as part of our management evaluations.*
