Managing Director of Heritage Ceramics
Ho Kok Zee

Dear Valued Customer,

I would like to extend my sincere gratitude for granting us the opportunity to showcase our Company Profile.

Heritage Ceramics was established in 2001, with a primary objective of providing our customers with world-class tile products. With over two decades of experience in the tiling industry, we have built an unparalleled reputation for delivering top-notch tiles and services to customers globally.

Central to our ethos is the transformation of Heritage Ceramics into not just a tile manufacturer, but a company deeply attuned to the needs and desires of our clientele. We pride ourselves on not merely manufacturing tiles, but also on our proactive approach to market analysis and our ability to deliver precisely what our customers require. Our services are not confined to standard offerings; they are tailored and adaptable to meet the unique needs and preferences of each client.

Our team comprises approximately 50 highly skilled and experienced professionals who continually undergo training to uphold the highest standards and ensure exceptional customer experiences. Moreover, we prioritize the welfare of our employees and are dedicated to fostering a healthy work-life balance while continually enhancing our operational methodologies.

Innovation is at the core of our ethos, as evidenced by our ongoing development of cutting-edge solutions such as GripTec and GuardTec Technologies. Concurrently, our unwavering commitment to sustainability remains steadfast, with our manufacturing practices and materials adhering to the highest environmental standards to safeguard our planet.

We are confident in our ability to cultivate a sustainable future for all stakeholders and firmly believe that our core values align closely with those of your esteemed organization. We eagerly anticipate the opportunity to collaborate with you and deliver outstanding services as your trusted tile manufacturing partner.

Thank you once again for considering Heritage Ceramics as your trusted partner.

Warmest Regards,

Ho Kok Zee

Managing Director

ABOUT US

Founded in 2001, Heritage Ceramics is a leading China tile manufacturer, creating premium porcelain tiles that combine style, performance, and sustainability. With over 20 years of expertise and a presence in more than 10 countries, we partner with retailers, distributors, developers, designers, and architects to bring iconic projects to life.

From our Headquarters in Foshan, China, and our Branch Office in Singapore, we blend global perspectives with innovative design and world-class production to deliver tiles that inspire and endure. With Heritage Ceramics, you can achieve timeless designs that make your dream a reality.

“AT HERITAGE CERAMICS, WE ELEVATE SPACES & INSPIRE LIVES.”

Vision

We aim to be the choice service provider of tiles and an influencer in the tiling industry.

Mission

We empower our employees to consistently deliver exceptional solutions and outstanding services in all our business endeavours.

CORE VALUES

QUALITY

Known for our high quality products and service, we do not compromise what we do for a quick profit. We strive to achieve consistency and excellence at every stage.

CUSTOMER FIRST

We put our customers needs and priority first. We are aligned with a single goal of ensuring complete customer satisfaction.

RELIABLE

Product quality, craftsmanship or customer service, our reliability exceeds expectations. Always at the forefront to adhere to our clients needs or request.

INNOVATION

Embedded in our culture is an aspiration to constantly seek innovation in design, material and technology. We strive to be trendsetters in the industry and to our customers.

TRUSTWORTHY

Our relationships with our clients and business partners are based on trust. We are a responsible and dependable service provider who conducts our business fairly, transparently and with full integrity.

MOTIVATED

Our uncompromising commitment to delivering superior products and services is our primary source of motivation to be the best in the industry.

**EXPANDING HORIZONS,
DRIVING OUR JOURNEY FORWARD.**

ORGANISATIONAL CHART

MEET OUR TEAM

Ho Kok Zee
Managing Director

With over 20 years of experience in the ceramic tiles industry, Kok Zee's leadership continues to propel Heritage Ceramics forward, building a strong and growing global presence.

Marcz Ng
General Manager

With over 20 years in the building materials industry, Marcz brings deep expertise, strong industry insight, and the leadership to drive lasting success.

Rachel Teng
Finance Manager

Head of Finance with strong financial acumen and strategic insight, ensuring robust governance and supporting the sustainable growth of Heritage Ceramics.

Alex Du
Operations Manager

Alex oversees all operations managing shipments, and team coordination to ensure efficiency and uphold Heritage Ceramics' standards of excellence.

Zhang Yan
Quality Control Manager

With extensive experience in the ceramic tiles industry, Zhang Yan leads the Production & Quality Assurance Team, upholding the highest standards of product excellence.

Jason Aow
Product Development Manager

Jason leads the R&D team with strong creative vision and industry insight, driving tile design innovation through in-depth market research and strategic direction.

Karen Gan
Head of Human Resource & Admin

Karen oversees HR and Administration, ensuring smooth operations, efficient processes, and a positive workplace that drives teamwork and productivity.

Chee Zi Ning
Marketing & Business Development

Zi Ning leads Marketing and Business Development, managing online and offline strategies to grow the brand and business.

“SUCCESS IS POWERED BY OUR PEOPLE.”

The cornerstone of Heritage Ceramics' success lies within the dedicated efforts of our employees. We deeply value their unwavering commitment to achieving excellence, both for the company and our clients.

Recognizing the pivotal role they play, we prioritize providing our team members with ample resources and training opportunities to foster their growth. In today's fast-paced world, we understand the importance of striking a balance between professional development and personal well-being.

To support this ethos, we regularly conduct training workshops and encourage employees to pursue further education to enhance their skills. Additionally, we prioritize their welfare by organizing team bonding activities and introducing initiatives like Family Day. This program allows our employees to enjoy early Fridays once a month, enabling them to spend quality time with their loved ones.

At Heritage Ceramics, we believe that by investing in the growth and happiness of our employees, we pave the way for sustained success and fulfillment for all.

CORPORATE SOCIAL RESPONSIBILITY

At Heritage Ceramics, our dedication to corporate social responsibility (CSR) runs deep, guiding us to give back to the communities we serve. Through our CSR initiatives, we prioritize making positive changes through charitable contributions and active community engagement.

DONATIONS

Our CSR commitment extends to supporting various charitable causes that address crucial social issues and provide aid to those in need. Whether it's supplying essential items to vulnerable individuals or backing organizations dedicated to community development, we believe in the transformative power of giving back to create a better world.

COMMUNITY INVOLVEMENT

We actively participate in community-driven projects and volunteer activities to make a meaningful difference. In 2024, we launched a new initiative, the Beach Cleanup Project, as part of our environmental conservation efforts. This initiative reflects our dedication to preserving natural habitats and promoting sustainable practices.

By uniting our efforts in both donations and community involvement, we aim to leave a lasting impact and nurture a culture of empathy, compassion, and social responsibility. At Heritage Ceramics, we are committed to collaborating with our communities to build a brighter, more inclusive future for everyone.

> “TOGETHER, WE CAN BUILD A BRIGHTER AND MORE INCLUSIVE FUTURE.”

SUSTAINABILITY

GET INTO GREEN SCENE WITH HERITAGE CERAMICS.

Since 2001, we have been designing, producing and paving millions of square meters of floors. With more than 20 years of experience, we are constantly advancing and innovating in terms of our design, quality of service, and ensuring that we keep up with the latest trends. In recent years, we are starting to focus more on sustainability and our impact on the environment.

For the past 20 years, prior to this, we have been at the forefront of sustainable manufacturing - reducing carbon emissions, energy consumption and waste. Our annual consumption used to be a huge part of our running cost, However it is now reduced drastically, saving tonnes of CO_2 emissions annually.

Furthermore, our porcelain tiles are made using sustainable and natural materials e.g. clay, feldspar, sand. Heritage Ceramics is committed to technological innovation with by respecting the environment and we hope to become a company that sets a good example for the rest.

THINK GREEN
LIVE GREEN

The factories that we work with meet the highest standards of emissions to environment, including recycling of waste products and water.

We work with reputable manufacturers to ensure that our products meet our sustainability standards.

Space & Studio Series has earned the prestigious Singapore Green Building Product Certification (3 Ticks: Excellent) for our Singapore Project Market. This is a Type 1 Eco-Label that is on par with many international eco-labels like Cradle2Cradle, DECLARE, Global Green Tag, Good Environmental Choice Australia, Korea Environmental Industry and Technology Institute.

Space & Studio Series have been awarded the Singapore Green Labelling Scheme (SGLS) certification by the Singapore Environment Council. This certification recognises products that meet stringent environmental standards, reflecting their reduced environmental impact.

In areas of learning and development, we are working with sustainability experts to tailor training modules where we educate staff on the sustainability framework and carbon footprint reduction.

As the extraction of raw materials for ceramic tile production may inadvertently contribute to deforestation, we have made a commitment to support environmental initiatives through donations.

“PUSHING BOUNDARIES IN SUSTAINABILITY”

Heritage Ceramics stands at the forefront of sustainable manufacturing across our three distinguished brands. We are immensely proud to have achieved the esteemed 4 Ticks, Leader certification from the renowned Singapore Green Building Product (SGBP) scheme, for our Singapore Project Market.

The Singapore Green Building Council (SGBC) established the SGBP certification scheme in 2010 to drive sustainability in the construction industry. This scheme acts as a vital compass for product development, ensuring the availability of environmentally friendly building materials and services, thus positively influencing the spaces we inhabit.

The SGBP certification, formulated by a consortium of industry experts, is acclaimed for its comprehensive sustainability criteria. It holds significant recognition from authorities such as the Building and Construction Authority (BCA), Housing and Development Board (HDB), and other public agencies. Additionally, it complements the BCA Green Mark scheme, garnering additional recognition.

Regarded as one of Singapore's most rigorous green building product benchmarks, the SGBP certification enjoys widespread acceptance across regional green building rating systems.

This certification signifies that Heritage Ceramics' products and materials are inherently carbon-efficient, with sustainability deeply ingrained in our design and manufacturing processes.

Join us on our journey as we continually enhance our sustainability initiatives, one tile at a time.

GREENER CHOICES, BRIGHTER FUTURE

At Heritage Ceramics, we are proud to have our products certified under the Singapore Green Labelling Scheme (SGLS), reflecting our commitment to environmentally responsible manufacturing.

What is SGLS Certification?
The Singapore Green Labelling Scheme (SGLS) is Singapore's national eco-label, administered by the Singapore Environment Council.

It is a Type I Eco-label (ISO 14024), meaning products are independently verified against strict environmental criteria across their lifecycle.

Assessment Criteria
SGLS certification assesses products based on their overall environmental impact across the lifecycle, including resource efficiency, health and safety, and product performance—ensuring they are both sustainable and fit for use.

In Singapore, SGLS is recognised as the national eco-label, widely used by businesses and organisations as a trusted reference for environmentally preferred products. Administered by the Singapore Environment Council, it supports sustainable procurement by identifying products that meet independently verified environmental standards.

Globally, SGLS is recognised through its alignment with ISO 14024 Type I Eco-label standards and its membership in the Global Ecolabelling Network (GEN). This positions it alongside other leading international eco-labels, giving it credibility beyond Singapore and supporting its acceptance as a reliable indicator of environmental performance in global markets.

QUALITY MANAGEMENT

“QUALITY IS THE CORNERSTONE OF OUR BUSINESS.”

At the core of our operations lies an unwavering commitment to excellence. We prioritize the delivery of high-quality products by embedding stringent quality control (QC) processes into every stage of our production.

Our team of skilled QC specialists, equipped with years of experience and expertise, meticulously examines each product to ensure it not only meets but exceeds project specifications and customer expectations.

Through continuous advancements in technology and certifications, we reaffirm our unwavering dedication to delivering products of unparalleled quality.

OUR QC PROCESS

01 Our team offers advice on the project’s technical requirements and factory capabilities before the order is confirmed.

02 All orders are inspected not once, but at least twice. The first inspection is done immediately after the order has been received and the team has ascertained that the goods are available.

Another round of independent assessment and inspection is conducted when the goods are being physically dispatched to ensure the correct quantity and packaging, and proper loading and sealing of goods into the container right before shipment.

03 A specialised team handles all aspects of pre-shipment inspections, shipment preparation and container loading.

04 If the order requires special production, our team of inspectors will track the order from the raw material preparation stage till the time the goods come out of the kiln.

05 All materials that are accepted or rejected will be reported in detail to the company’s management.

06 All inspection reports, photographs, and loading process can be provided to the customer upon request.

TEST REPORTS

ISO 9001: 2015
Quality Management

ISO 9001: 2015

ISO (International Organization for Standardization) is a worldwide federation of national standard bodies (ISO member bodies). Members come together to prepare the required industry and quality requirements and standards for different type of products. Each member body interest in a subject for which atechnical committee has been established has the right to be represented on the committee. ISO 9001:2015 is an international standard for quality management systems that helps organizations consistently deliver products and services that meet customer and regulatory requirements. It emphasizes process efficiency, continual improvement, and effective resource management. At Heritage Ceramics, implementing ISO 9001:2015 supports our commitment to quality and sustainability by promoting streamlined operations and reducing waste. Although it is not an environmental certification, it complements our efforts toward responsible manufacturing and minimizing our environmental footprint.

ISO 13006:2018

ISO 13006:2018 establishes rigorous international standards for ceramic tile manufacturing, promoting efficiency, reliability, and high-quality production.At Heritage Ceramics, we take pride in ensuring our tiles comply with these standards by subjecting them to comprehensive testing, including surface quality assessments, mechanical strength evaluations, chemical resistance tests, etc. This thorough testing process guarantees that our products are durable and reliable, which helps minimize waste by extending tile lifespan and reducing the frequency of replacements. By adhering to ISO 13006:2018, we align our manufacturing practices with sustainability goals, demonstrating our commitment to producing eco-friendly, long-lasting tiles that support responsible building practices.

Trusted Independent Test Reports

To uphold the trust of our customers, our products are tested at recognized independent laboratories to ensure consistent quality and performance.

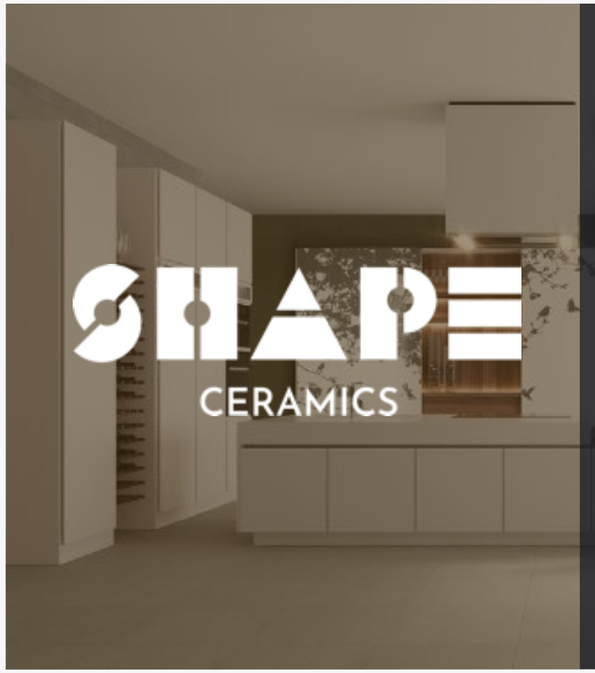

QUALITY SECURED. CERTIFIED AND TESTED FOR EXCELLENCE.

BRANDS

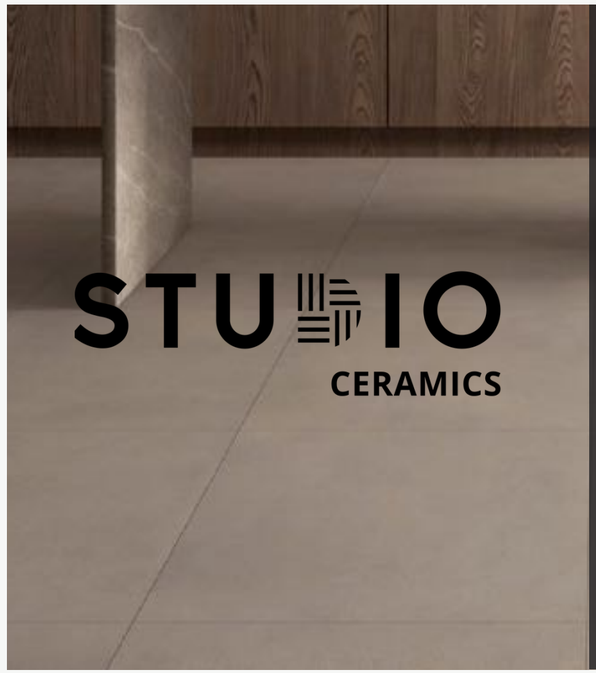

Premium Series

Space is our premium series, combining distinctive design with superior full-body porcelain performance. Exceeding ISO 13006 mechanical strength requirements, it is built for versatility and resilience, making it well suited for the most demanding commercial and industrial spaces.

Value-Oriented Series

Shape is our value-oriented series, featuring clean, timeless designs that fulfill essential porcelain tile standards. Developed for projects requiring fundamental specifications, it provides dependable dimensional stability, surface quality, and consistent tonality.

Core Series

Studio is our core series, designed to serve a wide range of market segments, including projects, retail and wholesale. It combines on-trend aesthetics with high-quality porcelain craftsmanship. Designed to meet ISO 13006 standards, it supports a wide range of environment spaces, across residential, commercial, hospitality, and institutional spaces, with a water absorption rate below 0.5% for lasting performance.

Antibacteria Technology

Introducing GuardTec, the latest antimicrobial protection for surfaces, keeping living spaces around us safe and protected.

OUR SERVICES

From production, sourcing, importing and exporting to retailing, we have our imprints on almost every stage of the supply chain.

WHOLESALE EXPORT

We import and export tiles from all over the region, offering one of the widest selections of tiles and flooring materials to our customers.

SHIPMENT

We help our customers with inspection, preparation and container loading, ensuring that shipments arrive at their doorsteps on time.

CONSULTANCY AND SOURCING

We also provide consultancy on tile specifications or certifications. Should there be any specific tile or design required for a project that is not in our catalog, our team will scour the world to source the right product.

OEM PRODUCTION

We offer OEM production of high quality tiles at affordable prices. Our presence in the country of production ensures that products manufactured there undergo stringent quality control and inspections before they are shipped to our customers.

GUARDTEC

ANTIMICROBIAL PROTECTION

Taking good care of our health is exceptionally important these days as microbes and bacteria could easily harm our bodies. Microbes and bacteria causes harmful effects to the body, some of which are skin allergies and respiratory problems. By having our floor and wall surfaces clean, it minimizes the spread of these bacteria and safeguards our health.

Introducing Heritage Ceramics' groundbreaking innovation, GuardTec, an antimicrobial protection specially invented for tiles, keeping living spaces around us safe and protected.

USING NANO ZINC OXIDE (ZnO) TECHNOLOGY

GuardTec uses nano-zinc oxide as the active agent, which is highly effective to inhibit the growth of bacteria on surfaces. GuardTec is embedded and fired into the tile's glaze, thus rendering antimicrobial properties, killing bacteria 24/7.

GUARDTEC'S EFFECTIVENESS

GuardTec is tested and proven to effectively kill up to 99.9% of bacteria and microorganisms. Antibacterial solutions only actively get rid of bacteria while Antimicrobial solutions such as GuardTec kills bacteria, fungi, algae and certain "micro-animals" such as house dust mites.

GUARDTEC CAN EFFECTIVELY ERADICATE THE FOLLOWING MICROBES

- Bacillus megaterium
- Sarcina lutea
- Pseudomonas aeruginosa
- Pseudomonas vulgaris
- Aspergilus niger
- Staphylococcus aureus
- Escherichia coli
- Klebsiella pneumoniae
- Candida albicans

TEST OF ANTIMICROBIAL ACTIVITY WITH REFERENCE TO ISO 22196:2011

	GuardTec Tile	Control Sample
Artificial contamination of surface (cells/mL)	6.9×10^{5}	6.9×10^{5}
Arithmetic average of the numbers of bacteria (cells/cm²) after 24 hours	3.8×10^{1}	3.9×10^{5}
Antibacterial activity rate (%)	>99.9	-

ANTIMICROBIAL TESTED

Kills up to 99.9% of bacteria and microbes
Test Report No: 10501305/20
ISO 22196:2011
Tested by SGS Testing Control Services Singapore Pte Ltd

GUARDTEC
ANTIMICROBIAL PROTECTION

BENEFITS & CERTIFICATION

KILLS BACTERIA

The presence of bacteria is common and contamination can occur easily if we do not practice proper hygiene in areas we live in. GuardTec inhibits the growth of bacteria on floor and wall tiles, providing a cleaner living space for all.

PURIFIES AIR

Nano Zinc Oxide (ZnO) present in GuardTec's technology has the ability to absorb harmful air particles via its ROS process. This purifies the air we breathe and prevents any adverse health effects.

DEODORIZING

Unpleasant smell arise due to the presence of high fatty acids in the environment. GuardTec helps convert these fatty acids into water insoluble, non volatile salts. This in turn deodorises and enhances the scent around your environment.

SAFE

Nano Zinc Oxide (ZnO) is a common ingredient found in many daily products we use and consume. From breakfast cereals, baking flour, cosmetic products, lotions and soaps, Nano Zinc Oxide (ZnO) is known for its positive effects on general health.

VIRTUAL SHOWROOM TOUR

BRINGING SHOWROOM EXPERIENCE IN THE COMFORT OF YOUR HOME.

Heritage Ceramics' Virtual Showroom Tour has been developed in response to the challenges posed by the Covid-19 pandemic, offering our global customers the opportunity to explore our extensive range of tile collections and designs from the comfort of their own homes.

As users navigate through the virtual tour, they have access to detailed product descriptions and technical specifications, providing an immersive experience that closely mimics an in-person viewing.

With high-quality resolution capturing the colors, textures, and finishes, customers can confidently evaluate our offerings with precision and clarity.

The Virtual Showroom has proven invaluable for our global clientele, allowing us to adapt and thrive during the pandemic and beyond. It serves as a testament to our commitment to innovation and customer satisfaction.

OUR PROJECTS

At Heritage Ceramics, our commitment extends across a diverse range of projects, including Residential, Commercial, Hospitality, and Institutional sectors.

With a global footprint, we have successfully paved millions of square meters across more than 1,000 projects in prominent locations worldwide, including Singapore, Thailand, the Philippines, Vietnam, Brunei, South Korea, Japan, Australia, and New Zealand.

COMMERCIAL

For decades, Heritage Ceramics has been a leading force in shaping commercial projects, fostering dynamic partnerships globally. Through collaborative efforts with each client, we've realized their ambitions with unparalleled creativity and adaptability.

Our dedication to customized solutions underscores Heritage Ceramics' trailblazing role in commercial development. With each project, we blend imagination and teamwork to craft remarkable experiences infused with boundless energy and expertise.
